NİLUFER DASTAN

✉ NiluferDastan@outlook.com   github.com/NiluferDastan   🌐 linkedin.com/in/niluferdastan/

I am a highly skilled and motivated Data Scientist with a solid background in statistics and programming. My academic journey includes courses which I had given students for help them exams at prestigious institutions such as Stanford, Berkeley, UCLA, Bologna, Sorbonne, Sam Houston, Purdue, Michigan, where I developed my expertise in statistical analysis, regression modeling and optimization techniques. I think I am improving myself as if I were an international university graduate. I know that my own university is poorly known. So I thought I should present these.

My experience has not only taught me how to analyze data using various statistical methods but also how to use programming languages like R, Python, Tableau, STATA, SAS, SPSS, and Power BI to create data-driven solutions. I have also worked on multiple projects using datasets from various fields, honing my skills in data analysis and visualization.

I am excited to take my theoretical knowledge and apply it to real-world projects at your company. I am confident that my skills and experience make me a strong fit for this position.

Thank you for considering my application. I look forward to hearing back from you.

Best Regards
